VISUAL COMFORT & Co.

Finishes & Materials

HOW ARE YOUR FIXTURES MADE?

All Visual Comfort & Co. products are made by hand. Every component has been individually finished by master craftsmen, therefore small variations between fixtures is to be expected. These are not defects but evidence that each piece is a crafted work of art.

WILL THE APPEARANCE OF MY FIXTURES CHANGE OVER TIME?

Many of our pieces are made from live materials which will richly patina over time. Please contact us with questions about our finishes and materials.

Care & Cleaning

HOW DO I CLEAN MY LIGHT FIXTURES?

Clean all our products with a soft, dry cloth only. Do not use scouring agents, abrasive sponges, hydrochloric acid, vinegar (acetic acid) cleaners, ammonia or metal silicates.

Mercury Glass: Clean with a feather duster. Wiping with a cloth or cleaning solvents may remove antiquing.

HOW DO I POLISH MY LIGHT FIXTURES?

When polishing is necessary we recommend the following:

- Simichrome Polish for Chrome and Polished Nickel
- Goddard's brand polishing cloths for Polished Silver
- Bri-Wax to refresh and protect our Bronze and Gun Metal finishes
- Brasso will remove any existing patina and brighten our Natural Brass, Hand-Rubbed Antique Brass and Antique Burnished Brass finishes.
- Our Soft Silver and Soft Brass finishes should not be treated. Clean with a soft, dry cloth only.
